

SHEET 1 - Brainstorm

Name: Xiaowen Zhou

Date: 01/10/2024

* IDEAS

1. Interactive line chart.

- Visualize the trends in age rates of drug-induced deaths over time

2. Global Comparisons Bar chart.

3. Heat map for Ambulance Attendants.

4. Stacked Bar chart of Psychosocial Risk Factors

5. Scatter Plot of Alcohol Consumption vs Deaths

* FILTER

1. Year Selector

→ Time Range

2. Drug Type and class

e.g. opioids, stimulants

3. Geographic Filter

→ Regions

4. Demographic Filters

↓ Map

* Categorize

1. Data Categories

- Health Impacts

- Behavior Patterns

2. Visualization Types

- Emergency Response

- Trend Analysis

- Geographic Insights

- Average Comparisons

- Regional Focus

OCEAN COUNTRIES

* Combine & Refine.

- Combine Health and Behavior.

Overlay line charts of drug-induced deaths with alcohol consumption data.

Use dashboards to switch between and OCEAN Countries

- Refine User Experience.

Simplify Filters

Group visualizations by theme.

Health impacts, emergency response, behavior.

Color coding for drug classes: Cannabis, Heroin, All opioids.

* Summarize and Questions

① Summary of Dashboard Goals

Aims to provide a interactive exploration of substance use Data Information

Key Questions to Address ②

- How have drug-induced deaths evolved in rural vs. urban areas over the years?
- What are the key psych

SHEET 2 - Initial Ideas

Title - Initial Concepts for the Alcohol, Tobacco, and Other Drugs Dashboard.

Name: Xiaowen Zhu,

Date: 01/10/2024

Description - The sheet outlines the initial ideas for the dashboard's design, focusing on how to present data on alcohol, tobacco, and drugs use in Australia. The design balances detail with accessibility to provide clear visualizations of data trends and comparisons with international benchmarks.

Big Picture / Layout.

Top Section - Overview & Summary

A High-level summary key statistics.

Counters

Middle Section - Trend Analysis

Lower Section - Geographic Insights

Bottom Section - Health Impacts & Risk Factors

Components / Operations

1. Interactive Line charts (Trend Analysis)

2. Heatmap (Geographic Insights)

3. Bar chart (Health Impacts)

4. Scatter Plot (International Comparison)

5. Summary Cards (Overview)

Parti / Focus.

1. Trend Analysis.

2. Regional Comparisons

3. International Benchmarking

Good Countries

Pro & Cons

Pros.

- Comprehensive Analysis.

- User-friendly.

- Customizable Views

- Highlighting key Trends.

Cons.

- Data Overload.

- Performance Considerations

- Complexity in Comparisons

- Steep Learning Curve.

Interactive maps.
Time-series charts.

SHEET 3 - Initial Ideas.

Title: Detailed Initial Design Concepts for the Alcohol, Drugs Dashboard. Name: Xiaowen Zhou.

Description: This sheet focuses on refining the initial design concepts, breaking down the specific visualizations, and interactions that will be part of the dashboard. Highlights show the data will be presented in an engaging and intuitive way, ensuring that key insights are accessible to all users.

Big Picture / Layout

1. Header - Quick Summary
Display headlines statistics.
Uses a series of summaries

2. Section 1 - Trend Analysis.

Interactive line and area charts.

A dropdown menu and checkboxes to filter

3. Section 2 - Geographic Analysis.

Interactive map of Australia.

4. Section 3 - Health Impacts Analysis.

A set of stacked bar charts.

Filter by specific risk factors

5. Footer - User Tools & Navigation:

contains buttons for exporting data visualization, internal help

Comparison / Operations

1. Line charts (Trend Analysis)

2. Heat Map (Geographic Analysis)

3. Pie charts (Drug Impacts Analysis)

4. Sankey Diagram (Interaction Comparison)

5. Radar Chart (Footer)

Parts / Focus

1. Interactive Exploration of Trends

2. Regional Disparities and Focus

3. Impacts

4. Making complex health data

Pro & Cons.

Pros

- Guided Data Exploration
- Customization Options
- Clear Visual Hierarchy
- Engagement with Interactive Elements

Cons.

- High Data Density
- Complex Filters.
- Performance Issue
- Steep learning Curve for Detailed Analysis

Title - Exploring Alternative Design Concepts for the Alcohol, Tobacco, Drug.

SHEET 4 - Initial.

Name: Xioonen 26th.
Date: 22/10/2024

Description - This sheet presents an alternative approach to designing the dashboard, focusing on new ways to visualize and interact with the data related to alcohol, tobacco and other drug use in Australia. It considers ways of dashboard to broaden the possibilities.

Big Picture / Layout

1. Top Section - Modular Overview Cards

a mini Line Charts or Sparkline to show recent trends and a comparison with year

2. Left Panel - Interactive Filters & Options

A collapsible sidebar with options to filter

3. Central Vis Area - Main Data Section

4. Right Panel - Insights & Analysis

A sidebar

Broader context or explanation of trends

5. Bottom Section - Customizable Reports & Downloads

1. Modular Overview Cards (Top Sections)

2. Collapsible Filters (Left Panel)

3. Dynamic Visualization Area (Central Section)

4. Insights Panel (Right Section)

Part 2 / Focus

1. Modular Data Exploration

2. Dynamic Visual Interactions

3. High-Drive Design

4. Regional analysis

Button

Alcohol

Tobacco

Drugs

Map Section

Pre &

Pros

- Enhanced Flexibility

- User-Friendly Filters

- Contextual Insights

- Report Generation

Cons

- More complex User Interface

- Possible Performance Issue

- Requires clean codebase

- Balancing Detail and Simplicity

SHEET 5 - Realization

Title: Detailed Realization of the Alcohol, Tobacco, And Other Drugs Impacts.

Name: Xiaoren Zhou
Date: 03/10/2024

Description: The focus is on finalizing the layout, visual styles, and interactive features, ensuring a cohesive user experience. It breaks down each component, describes how the data will be presented, and outlines the detailed operations needed for a functional and effective dashboard.

Big Picture / Layout

Proportion of Daily Smokers By Sex And People

Alcohol Consumption (Liters per) Average People

Average Number of Cigarettes Smoked by Day

Alcohol-Induced Deaths by Age Group

Drug-Related Ambulance Calls

Parti / Focus.

* Intuitive Interaction
The design ensures that users can easily navigate between different sections.

* Visual Clarity:
The layout prioritizes clear and easy-to-read visualization.

* Data Accessibility:
Aims to make the dashboard accessible and user-friendly.

Components / Operations

- Navigation Bar Button to Select 3 Maps (Top Section)
- Dynamic Visualization Area (Main Section)
- Filter Controls (Left Sidebar)
- Insights Panel (Right Sidebar)
- Export Tools (Footer)

Details.

1. Data Sources and Structure.
 - Data Cleanly
 - Frontend Interface.
 - Backend Process
2. Visual Design Choices.
 - Color Scheme
 - Font and Readability.
3. Interactivity Features
